

How Chord Charts work

The fingers on your left hand are numbered.

Below is a blank chord chart labelled to show what the different parts represent.

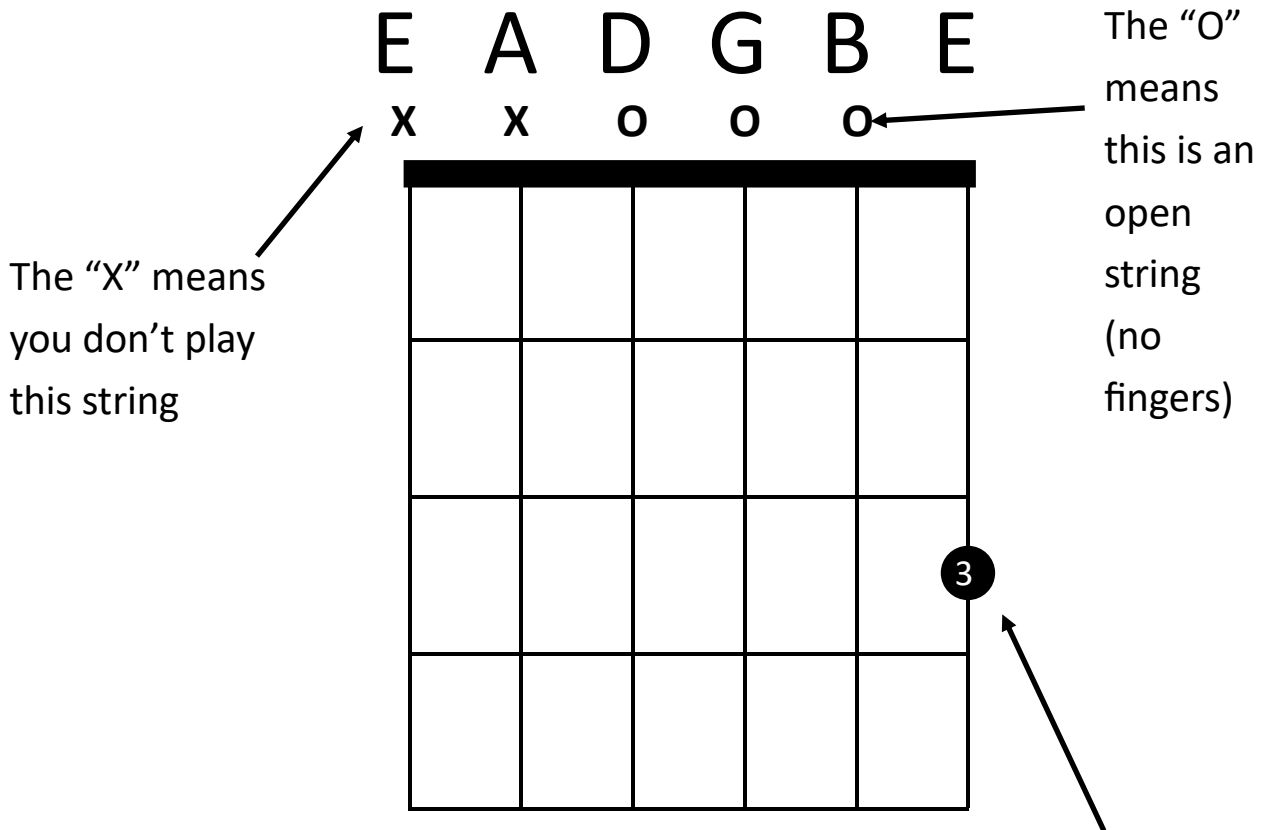

It is like a picture of the top 4 or 5 frets of a guitar neck

The Chord of G

Place your 3rd finger in the 3rd fret on the top E string.

Then strum the top 4 strings (don't play the other 2!)

The numbered circle shows:

- Which Finger (ring)
- Which String (top E)
- Which Fret (3rd)
