FOR PARENTS OF CLOSE CONTACTS OF COVID 19 at Rook's Nest Academy

### **Advice for Child to Self-Isolate for 14 Days**

Dear Parent,

As you are aware there has been a confirmed case of COVID-19 within RNA.

We have been advised by Public Health and have identified that your child has been in close contact with the individual who has tested positive for COVID19. In line with the national guidance we request that your child now stays at home and self-isolates until **Monday 19<sup>th</sup> October** (14 days after contact).

We are asking you to do this to reduce the further spread of COVID 19 to others in the community.

During this period of isolation we will provide remote learning via emails and the website.

If your child is well at the end of the 14 days period of self-isolation, then they can return to usual activities, including returning to school.

Other members of your household can continue normal activities provided your child does not develop symptoms within the 14 day self-isolation period.

Further guidance for those who have been identified as a close contact of someone with confirmed coronavirus (COVID-19), but do not live with that person, can be found here: <https://www.gov.uk/government/publications/guidance-for-contacts-of-people-with-possible-or-confirmed-coronavirus-covid-19-infection-who-do-not-live-with-the-person>

### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119 .

All other household members who remain well must stay at home and not leave the house for 14 days. This includes anyone in your 'Support Bubble'.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school/college or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or

family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If you are able can, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

Please see the link to the PHE 'Stay at Home' Guidance:

## **Symptoms of COVID 19**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

**For most people, coronavirus (COVID-19) will be a mild illness.**

If your child does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 111.

## **How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

*Do*

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

## **Further Information**

Further information is available at
